## **DRILLING TO START ON BLUEBIRD COPPER STRIKE, NT**

---

As previously announced, Meteoric Resources completed an extensive shallow geochemical RAB drilling programme over combined magnetic and gravity targets in the Persistence-Bluebird area of the Barkly project about 30km east of Tennant Creek. The drilling was targeting Tennant Creek-style high-grade copper-gold mineralisation associated with magnetite and hematite ironstones.

The geochemical drilling defined a 600m-long bedrock copper anomaly, with associated gold and bismuth, along strike from the old Bluebird workings and open to the east. A limited follow-up programme of RAB drilling on this anomaly gave a best intercept of **8m at 1.0% Cu and 0.3g/t Au from 72m at end of hole**. Detailed gravity and ground magnetic surveys show a pronounced gravity and magnetic anomaly coincident with the geochemical anomaly, suggesting that the mineralised Bluebird ironstone extends to the east.

Following these encouraging results a 3,000m programme of inclined RAB drilling is proposed with the aim of testing geochemical, gravity and magnetic targets over an 800m strike length mostly east of Bluebird, where very little drilling has been completed to date. The drilling is scheduled to start this week.

The Barkly project is a joint venture with subsidiaries of Giants Reef Mining Limited, now Centralian Minerals Limited (Subject to Deed of Company Arrangement). Under the terms of the joint venture Meteoric has now earned a 51% interest in the JV tenements and has the right to increase this to a 70% interest by expenditure of \$200,000 by November 2009.

The information in this report that relates to exploration results is based on information compiled by Roger Thomson BSc, ARSM, MAusIMM, who is a Member of the Australian Institute of Geoscientists. Roger Thomson is an employee of Meteoric Resources NL. Roger Thomson has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 edition of the 'Australasian Code of Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Roger Thomson consents to the inclusion of this information in the form and context in which it appears in this report.
